This is a testimony about the Vindicator nozzle

My name is John Henkel, I'm a captain on the Louisville City Fire Dept.

We have used the Vindicator nozzle for the past six months.

And I will tell anyone that this is the best attack nozzle that I have ever seen or used.

For example we just recently had a well in evolved house fire,

The call came in @ 20:22 hrs on Dec. 1, 2008. we were on scene 20:28, first report was Single story brick ranch, with heavy fire coming from the front door and the two front living room windows our main attack line is 200ft pre-connect 1 ¾ inch line.

With the Vindicator nozzle we made entry through the front door @ that time the fire was blowing out the rear C side as well, the fire was completely out by 20:45.

The initial hit darkened down the entire front room and kitchen area immediately.

Big fire big knock down I can't say enough about this nozzle, we also bought 2 more

And they to will be the main nozzles on the other trucks as well.

If anyone is interested in talking with me please feel free to contact me @ The Fire station 330-875-2663 leave your contact information if I'm not available

And I would gladly talk more in depth about this great nozzle that will save your personal and wear on your pump.
